

FOREST HILL CHILDCARE CENTRE

Location | 269-271 CANTERBURY RD, FOREST HILL

Corplex have worked in collaboration with Allaf Property Group to bring the Forest Hill childcare centre to fruition concurrently with the Keilor Downs and Lara childcare projects.

This two-storey precast concrete panel facility is situated on a large 2010m² site, which allows the centre to cater for 122 children at any one time. The steep gradient of the site required a creative design that resulted in a ground floor and partially excavated lower ground floor arrangement.

In keeping with the green aesthetic of Forest Hill, the landscaping includes large areas of greenery, sandpits, and shade sails, whilst the carpark features a bodpaved area that provides sufficient space for all vehicles whilst abiding by the council's 'Green Area' requirements.

A batten system of Woodform Concept click and Vitacore aluminium composite panel (non-combustible) clad the exterior of the centre and provides an inviting and aesthetically pleasing finish whilst maintaining the safety of occupants. Corplex has constructed a highly detailed internal fit out, which creates a safe and engaging environment without compromising on operability and quality.

Corplex are excited to be working with Allaf Property Group on several childcare related projects across Victoria, and could not be happier with a result that will inevitably bring joy to the children of Forest Hill.

PROJECT SUMMARY

Land Size:	2010m ²
Play Area:	864m ²
Building Size:	1212m ²

Redefining Construction
